"Piedmont" Brand Frost Proof Cabbage Plants

The market gardener who grows cabbage for early market or shipment knows how important it is to get cabbage on the market early, if large profits are to be realized. The home gardener also wants some very early cabbage, and wants to avoid the trouble and expense of growing plants in hotbeds. The best solution of this problem is THE FROST PROOF CABBAGE PLANT.

In South Georgia and parts of South Carolina the soil and climate are especially adapted to the growing of hard, tough cabbage plants during the fall and winter. The plants make a slow growth during the early part of the winter, and soon become very tough and hardy. When very cold weather comes the plants are dormant, the leaves are of a reddish purple color, and the plants may be shipped to territory with a colder climate. The plants will stand a temperature of 20 degrees above zero without injury, and may be set in the open field four weeks before hotbed plants. The top of the plant does not grow until warm weather comes, but the root becomes established, enabling the plant to make a rapid start, and mature headed cabbage two or three weeks earlier.

We make a specialty of growing HIGH GRADE Frost Proof Cabbage Plants. These plants are grown in the open field on our own farms at Albany, Ga. and Greenville, S. C. We grow all of our plants on our own farms from selected seed, and do not buy a plant that we sell. No second hand plants shipped. We therefore know exactly what we are shipping our customers.

The plants are pulled and carefully packed by expert help, so as to reach their destination in good shape. Different varieties are tagged so that our customers can separate different kinds. All plants are tied in bunches of 50. We can ship successfully to any part of the United States.

VARIETIES

Early Jersey Wakefield

Many market gardeners consider this the very best cabbage in cultivation for early market, and it is more largely grown than any other early cabbage. Its

merits are many, among which are uniformity in earliness and crop. The head is pointed in shape, of medium size, and is white, solid and tender. It is beyond question the best variety for early market, and always brings a good price on account of its earliness, thereby netting the grower larger returns. Our strain of this variety is of the very best.

Charleston Wakefield

This is a selection of the Early Jersey Wakefield, but makes a much larger head, and is a week to ten days later. It stands pre-eminent as the best spring cabbage for the South. It is probably more largely planted for shipment than any other variety. The heads are of uniform size, and maturity, and of very large size for an early cabbage. A strong favorite with Southern growers as a main crop.

Late Flat Dutch

This variety needs no recommendation, because it is one of the oldest in cultivation. The heads are very solid, distinctly flattened on top, and of excellent quality. It invariably forms very large and at the same time very hard heads, uniform in size and shape. It has a very short stem, and is a very compact grower, forming few loose leaves. This variety is considered as the standard very large late cabbage for home garden and market.

One of the earliest of the flat-head varieties. It is a second-early variety coming in immediately after early varieties. A sure header and a very hardy grower, both in cold and hot weather. The heads become solid long before they are fully grown, so that, though immature, heads of satisfactory size may be cut long before it is at its best. A splendid kind for winter heading, in addition to the main crop. Heads are of uniform shape not too flat and very solid.

Succession

Copenhagen Market

Plants of this variety ready for shipment March 1st.

This is the very earliest of the round headed varieties. Its chief features besides earliness are remarkable size, averaging 10 pounds, compactness, even maturity, and fine quality. Maturing at about the same time as the Early Jersey Wakefield, it produces larger heads than any other cabbage equally as early. The

heads are very heavy in weight, ball shaped, solid and firm, with a small core, fine texture, and splendid quality.

ONION PLANTS

We make a specialty of growing onion plants for the market. From long experience we find that they give much better satisfaction than sets. They will make larger and finer onions, stand cold weather better, and do not go to seed in the spring like sets. Therefore, we would strongly advise you to use plants instead of sets, whether for the market or home use. Our onion plants are grown from very best seed, and will be found true to name.

Varieties: White or Yellow Bermuda; Crystal White Wax Bermuda.

Prices: By Mail, postpaid, 500 for \$1.25; 1,000 for \$2.00.

By Express, Collect, \$1.50 per 1,000; over 4,000 at \$1.25 per 1,000; over 9,000 at \$1.00 per 1,000.

LETTUCE PLANTS

Land for lettuce should be very heavily manured and fertilized. Lay off the rows 18 inches apart, and set one foot apart in the row. If set in cold frame, they can be set 10 inches apart.

VARIETY: Big Boston.

PRICE: 100 for 40c; 500 for \$1.50 postpaid. By express \$1.50 per 1,000.

BEET PLANTS

By setting out beet plants you will get them on the table three weeks ahead of those grown from seed. They should be set out in the latter part of February or in the first part of March. Manure and fertilize the land the first of March.

VARIETIES: Early Eclipse and Early Blood Turnip.

PRICES: 100 for 40c; 500 for \$1.50, postpaid. By express \$1.50 per 1,000.

EARLY TOMATO PLANTS

We desire to call special attention to our early Tomato Plants. We strongly advise you to try a few of these plants for early setting. By setting our field grown plants early you will have ripe tomatoes on your table before your neighbors. We will have the plants ready March 25th, but you should not

order until danger of frost is over, unless you are prepared to protect them. We pack them in damp moss to insure fresh delivery.

VARIETIES

Earliana. The Earliana is probably more largely grown for the early market than any other tomato, as it is grown almost exclusively in some of the large trucking sections of the South. It is a very handsome shape, quite solid, and of fine quality.

McGee. A wonderful new tomato that has rapidly gained in favor in the South since it was introduced a few years ago. Remarkable both in yield and quality it is one of the most prolific bearers. The fruit is bright crimson in color, and of very fine quality.

New Stone. One of the heaviest and most solid of the large tomatoes of good quality. Fine for main crop and deservedly one of the most popular tomatoes for shipping, canning and home market. Of large size, bright scarlet color, and withstands rot and blight.

PRICES: 100 for 50c; 500 for \$1.50; 1,000 for \$2.50, postpaid. By express: 1,000 for \$1.75; over 4,000 at \$1.50 per 1,000; over 9,000 at \$1.25 per 1,000.

POTATO PLANTS

Our Potato Plants are grown from selected seed stock grown on our own farms. They are treated for all kinds of disease, and are government inspected. Our customers are therefore protected from the many kinds of potato plant diseases which are becoming so prevalent throughout the South.

All potato plant orders are booked and shipped in the order in which they are received. We advise you to place your order early, stating when you want them shipped. We advise you to have potato plants shipped by express.

We Grow only one Variety: THE PORTO RICO.

In our opinion there is no potato that has so many good qualities as the Porto Rico, as it is from two to three weeks earlier than any other yam potato. Enormous yielders, strong and vigorous growers, withstanding drought better than any other potato. Eating qualities unsurpassed, flesh red and very sweet, as they contain a larger percentage of sugar than any other variety. It also has the combined qualities of being the heaviest yielder and best keeper of any potato of the yam family.

To the market gardener who is looking for a very early potato, that is a heavy yielder, and of fine quality we strongly recommend this potato, as we know it is a potato he can build up a good trade on and hold it, from the fact that when his customers once get a taste of this potato they will call for no other. Most potatoes when fresh dug are dry and insipid, but the Porto Rico is soft and sweet from the very start, and satisfies the most fastidious.

PRICES: 500 for \$1.50; 1000 for \$2.75 postpaid. By express, collect, \$2.00 per 1000; over 4000 at \$1.75 per 1000; over 9000 at \$1.50 per 1000.

STRAWBERRY PLANTS

The Strawberry is the queen of all small fruit, and is considered by many to be the most profitable. No garden is complete without a bed of strawberries. The best strawberries are those that are grown in your own garden, and picked fresh from the vines as you use them. They are delicious, and the joy of having nice fresh berries for your own table fully repays for the small effort required to plant and grow them. 500 to 1,000 plants will produce sufficient berries for a large family and leave a good many to sell.

VARIETIES: Early: Excelsior, Missionary, Klondike, Lady Thompson, Dunlop. Late: Aroma, Gandy.

PRICES: 500 for \$3.50; 1,000 for \$6.50, postpaid. By express collect, \$2.50 for 500; \$4.50 per 1,000.

SUGGESTIONS TO CUSTOMERS

NAME, ADDRESS, ETC. We wish to impress upon you the importance of writing your name and full address plainly. If your express office is different from your post office be sure to give it. We receive orders every year with faulty addresses, which cause unnecessary delay.

REMITTANCES. You can send money safely by P. O. order, express order, bank draft, or check, and registered letter. Do not send stamps.

CARE OF PLANTS. As soon as your plants come, take them out of the crates and set them out. If your plants look yellow and dead, do not jump to the conclusion that they are worthless. FROST PROOF cabbage plants always look brown and tough and may look yellow after long shipment. Proper care and attention will bring them out, and they will make better cabbage than green, sappy plants.

PACKING. All plants are tied in bundles of 50. We make no charge for packing or packages above prices quoted. All plants are packed with best of care, and by expert help. We have shipped plants as far west as Colorado, and as far north as Massachusetts.

TERMS: Our terms are strictly cash with order. Positively no plants will be shipped C. O. D.

NON-WARRANTY. While we exercise great care to to have our plants pure and reliable, we give no warranty expressed or implied. We cannot be in any way responsible for the crop.

OUR GUARANTEE

As express and mail service is now back to normal, we can guarantee this year to deliver plants to you promptly, and in good condition. While we always do all that we can to deliver the plants promptly, they are sometimes delayed in transit, or lost through no fault of ours.

If you do not hear from us within a few days after sending your order, write us, stating the date you sent your order and the amount. If your plants should not arrive in good order, pick out the good ones, and notify us of the shortage at once. We guarantee satisfaction.

All claims must be made within 30 days from date of order.

The above guarantee is your protection. With it you need have no fear in sending us your money. We have been shipping plants now for over 18 years. With a steadily growing list of satisfied customers. We strongly advise you to send your orders to an old established concern. For reference we can give the Georgia National Bank, Albany, Ga., the Bank of Commerce Greenville, S. C., R. G. Dunn and Co., or Bradstreet, anywhere.
